Applicants elect with traverse to prosecute claims 12-14 and 26-28 of Group II drawn to method for determining a potential of a diabetic patient to benefit from anti-oxidant therapy by determining polypeptide phenotypes.

Claims 6-11 and 20-25 of Group I, drawn to method for determining a potential of a diabetic patient to benefit from anti-oxidant therapy by determining nucleic acid phenotypes, is withdrawn at this time.

Claims 29 of Group III, drawn to a kit for determining haptoglobin phenotype and instructions, is withdrawn at this time as well.

In the Office Action, the Examiner noted claims 1-5 and 15-19 link inventions I and II; and that the restriction requirement between the linked inventions is subject to the non-allowance of the linking claims, claims 1-5, 15-19. Upon the allowance of the linking claims, the restriction requirement as to the linked inventions shall be withdrawn and any claims depending from or otherwise including all the limitations of the allowable linking claims will be entitled to examination in the instant application.

For the reasons above, it is respectfully asserted that this restriction requirement is improper, and withdrawal is respectfully requested. All claims of Groups I and II and linking claims 1-5 and 15-19 should be examined together.

Applicants reserve all rights in these non-elected claims, claims 12-14, 26-28, 29 and linking claims 1-5 and 15-19, to file divisional and/or continuation patent applications.
